

WooCommerce module for PayUmoney

for WooCommerce 1.6 and 2.x

Caution: Always keep backup of your existing WooCommerce installation including Mysql Database, before installing a new module.

Install via WordPress plugin Installer:-

1. Login to WordPress Admin panel and goto Add New Plugin. Then click on Upload Plugin.

2. Choose this woocommerce-gateway-payu-in.zip and click Install Now.

Manual Installation:-

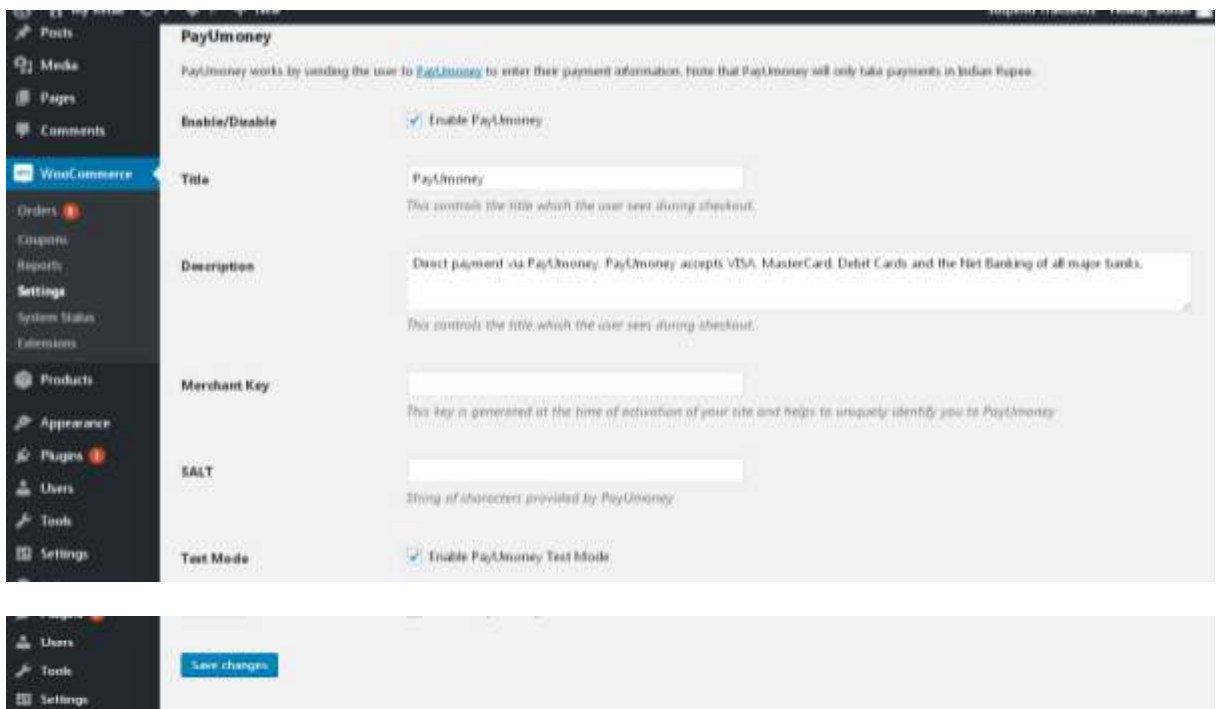

1. Unzip and copy 'woocommerce-gateway-payu-in' folder from this zip and paste/upload it to <wordpress root>\wp-content\plugins folder.
2. Login to WooCommerce admin and goto Plugins. Activate the plugin.

Configure Module:-

1. Login to WordPress admin and open WooCommerce Settings.

2. Click on Checkout tab and then on 'PayUmoney' plugin.

- **Enable/Disable** – Tick to enable the module.
- **Description** – Enter appropriate description to display at checkout.
- **Test Mode** – If enabled, will perform test checkout.
- **PayUmoney Key and Salt** – Configure Merchant Key and Salt for PayUmoney.

3. **Now click save and customer will get either PayUmoney or CitrusPay option during checkout process.**
