WOO COMMERCE

Integration Document

Introduction

This guide will show you how to configure PayUmoney as your payment processor on Woocommerce for payments through Credit Card, Debit Card, Net banking and Saved

Cards.This plugin is compatible with Woocommerce version 1.x & 2.x

Prerequisites

To Integrate PayUmoney payment gateway, you must:

1. Have a merchant account with PayUmoney. If haven't already registered, please visit https://www.payumoney.com/ and then register as a merchant.

2. Know your Salt & Key. These are available on the dashboard. If you already have a PayUmoney merchant account, please login at https://www.payumoney.com/ and you will be able to retrieve your salt and key from the "Account details" tab.
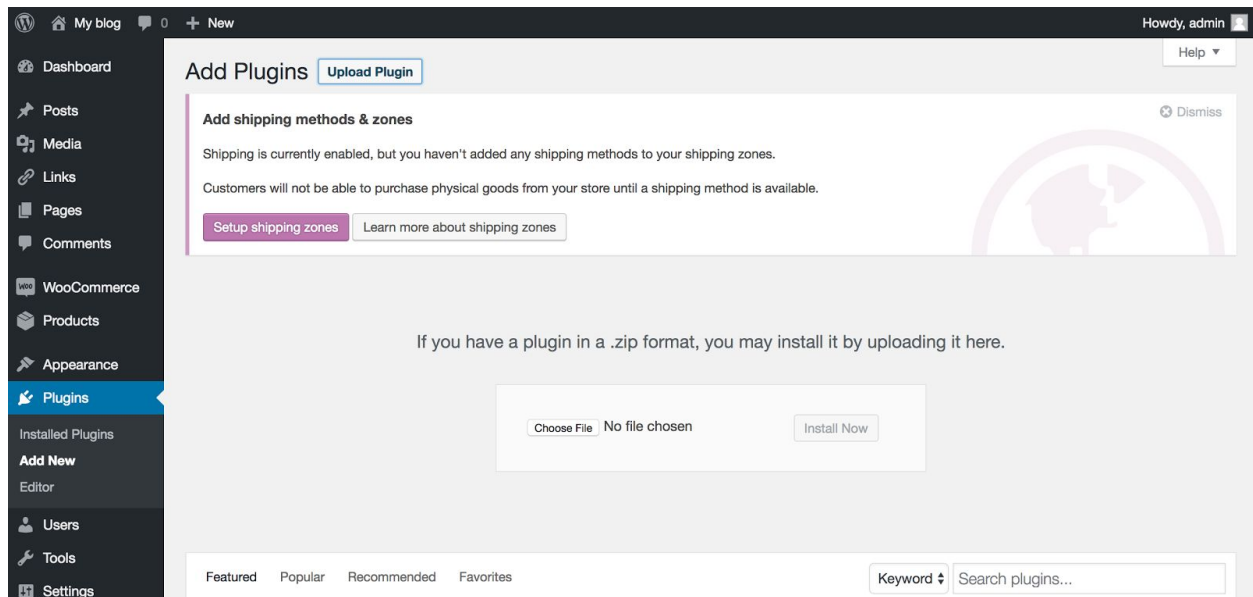

Steps to Integrate

Installing from the Wordpress Admin Panel
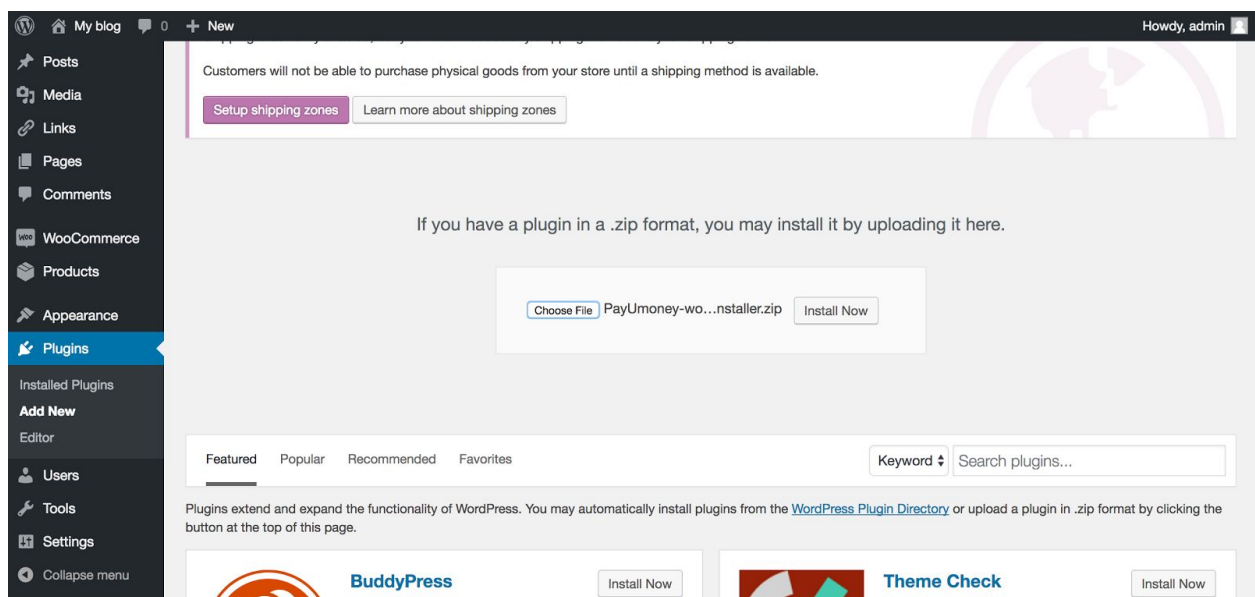

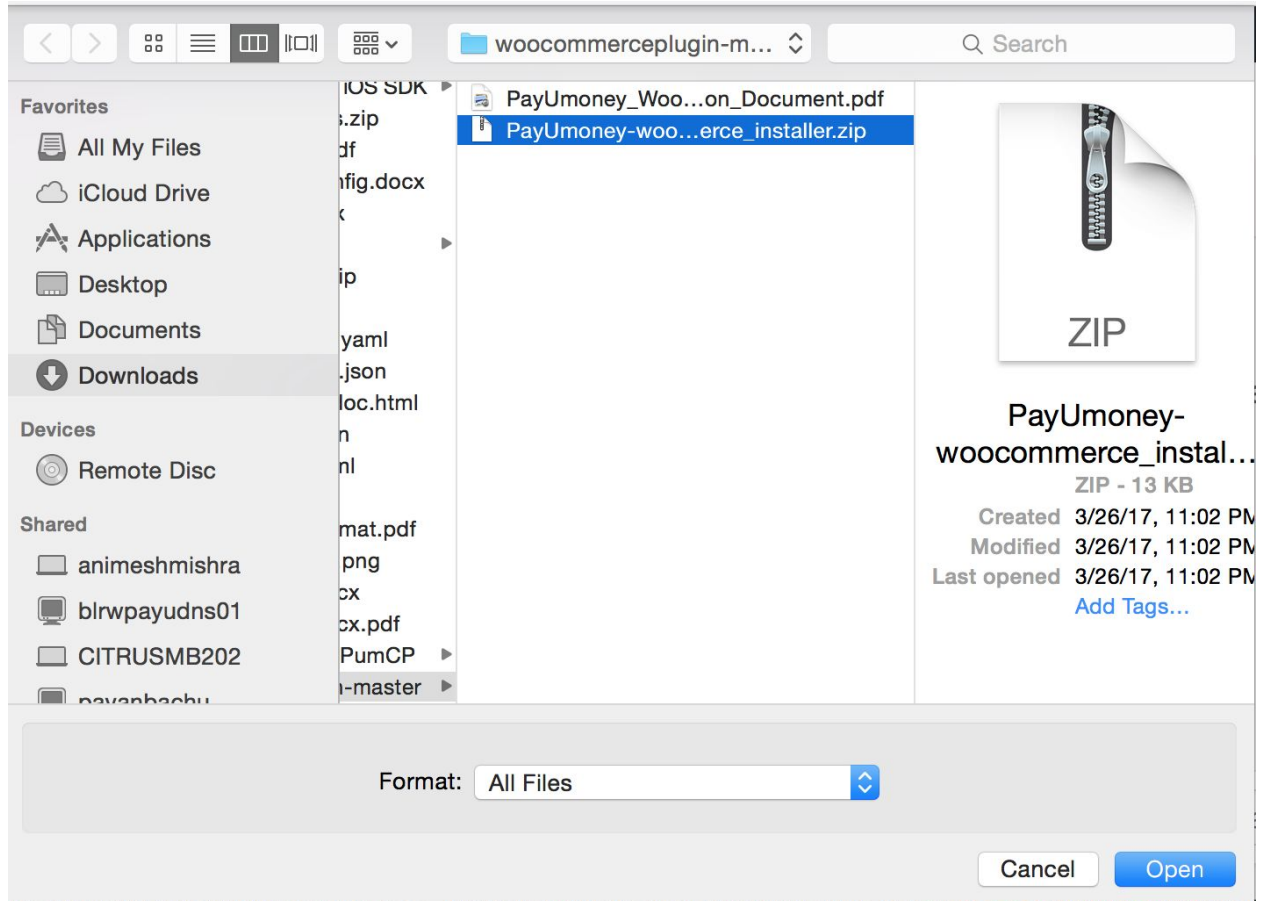

1) Login to your site as wordpress admin.

2) Choose **Plugins** from the Admin Menu & Click on '**Add New**' submenu to add new plugins.
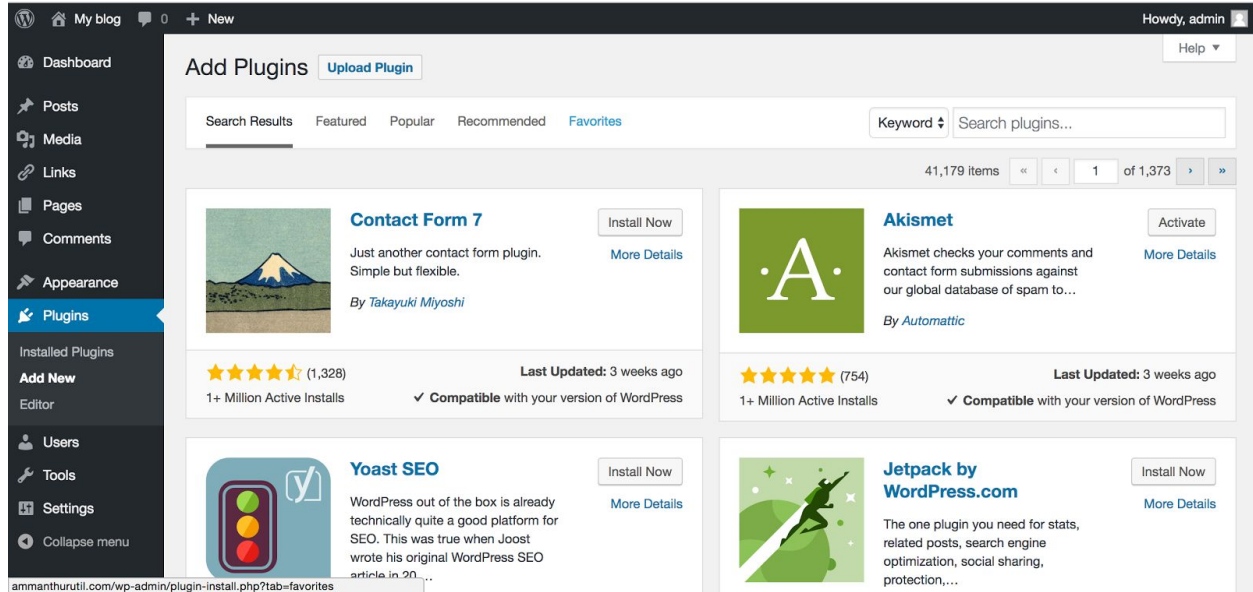

3) Click on **Upload Plugin** button on the top of the screen.

4) **Choose File** from the appropriate location of the **woocommerce-gateway-payu-in.zip** file on your computer.

5) Click on **Install**. Wordpress will then install the plugin and ask if you want to activate the plugin.

6) Click on '**Activate Plugin**' to activate the plugin.
7) Do Configurations as detailed in the section '**Configuring the Plugin'**.

Configuring the Plugin

1) From the WooCommerce Admin Menu choose **'Settings'** and then **Checkout**(In Older versions known as **Payment Gateways**).
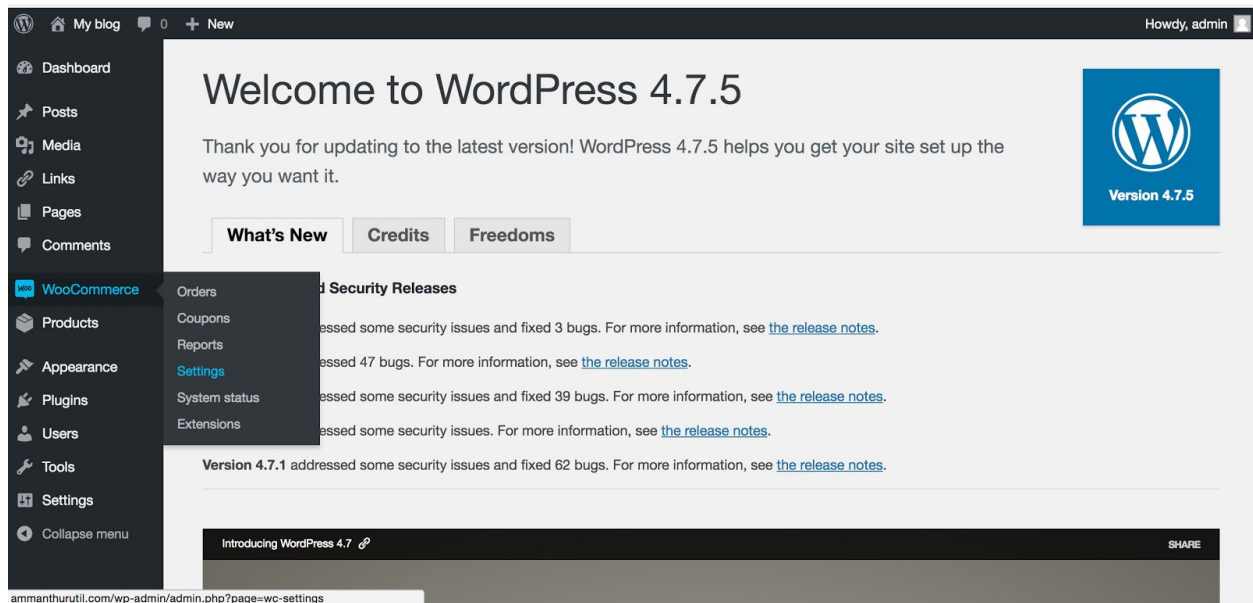

2) Scroll down and Choose **PayUMoney** to configure the Plugin.

	Set default payment method ?	set-default-payment-m		

Payment gateways

Installed gateways are listed below. Drag and drop gateways to control their display order on the frontend.

Gateway display order

Gateway	Gateway ID	Enabled
☰ Direct bank transfer	bacs	-
☰ Check payments	cheque	-
☰ Cash on delivery	cod	✓
☰ PayPal	paypal	-
☰ PayUMoney	payu_in	✓

Save changes

If you like **WooCommerce** please leave us a ★★★★★ rating. A huge thanks in advance!   Version 4.7.5

Note: If you do not see PayUMoney in the list at the top of the screen make sure you have activated the plugin from the WordPress Plugin Manager.
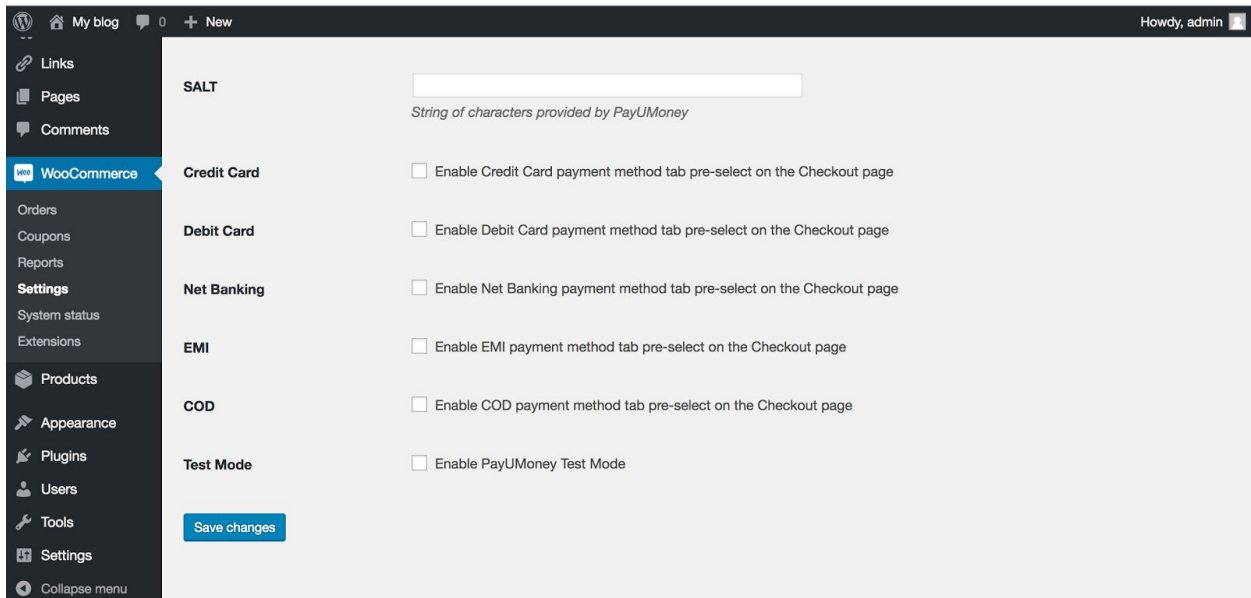

---

3) Enter the **Key** and **salt**. The values of key and salt are available in your Payumoney merchant dashboard.

PayUMoney

PayUMoney works by sending the user to PayUMoney to enter their payment information. Note that PayUMoney will only take payments in Indian Rupee.

Enable/Disable   ☑ Enable PayUMoney

Title   PayUmoney

This controls the title which the user sees during checkout.

Description   Direct payment via PayUMoney. PayUMoney accepts VISA, MasterCard, Debit Cards and the Net Banking of all major banks.

This controls the title which the user sees during checkout.

Merchant Key   rjQUPktU

This key is generated at the time of activation of your site and helps to uniquely identify you to PayUMoney

SALT   e5ilg1jwi8

String of characters provided by PayUMoney

Credit Card   ☑ Enable Credit Card payment method tab pre-select on the Checkout page

4)Scroll Down and enable the payment options you want to support.

5)Click on **Save**.Payumoney will now start appearing on your checkout page as shown in sample page below.

Testing

If you want to test the payment first, you should obtain test values for "Merchant Key" and "Salt" (not production) and enable checkbox "Enable PayU Test mode)".

Test MID: *4934580*
